

YVI TECHNOLOGIES DATA

IT Consulting and Services to Support Your Digital Transformation

Leverage our tailored software engineering services to optimize your digital capabilities. We are committed to supporting your efforts to streamline operations, improve efficiency, and enhance the customer experience through customized solutions.

About Us

Who We Are

Accelerating Your Digital Future

YVI Tech empowers organizations to advance their digital journey through customized IT consulting and transformation services. We help streamline operations, improve efficiency, and elevate customer experiences by delivering solutions aligned with your strategic objectives.

Our experienced consultants provide actionable, insight-driven guidance to optimize technology investments, reduce risk, maximize ROI, and accelerate data-led decision-making. Leveraging proven methodologies and innovative approaches, we design, implement, and manage end-to-end solutions tailored to your organization's unique business needs—enabling sustainable growth and measurable outcomes.

Services

Our Services

Our tailored-fit services definitely suits all kind of customer needs. Our customer-first approach is the main motto which made us to come up with blended services that would cater all our customer requirements with a long-lasting satisfaction.

IT Consulting

Our experts can help to develop and implement an effective IT strategy, assist in smooth digital transformation and system integration as well as advise on improvements to your digital customer experience.

Solution Design

YVI TECH committed to excellence, we specialize in creating reliable, scalable, and secure software solutions compatible with all operating systems, browsers, and devices. Leveraging extensive industry expertise and the latest technological advancements, we deliver customized solutions and products designed to meet the specific needs and behaviors of our clients' users.

Digital Solutions

YVI TECHNOLOGIES DATA

Our experts help mid-sized and large firms build, test, protect, manage, migrate and optimize digital solutions ensuring they're always up and running and achieve the optimal TCO.

UI/UX Design

We specialise in user experience and user interface design for a wide range of websites, SaaS platforms, and web/mobile applications. Our approach combines the latest industry trends with our clients' specific objectives and requirements to deliver intuitive, engaging, and impactful designs that enhance business performance.

QA and Testing

We offer full-range QA and testing outsourcing services, can help to develop your QA or enhance the existing one, assist you in TCoE setup and evolution. We perform end-to-end testing of mobile, web and desktop applications at each stage of the development lifecycle.

Data & AI Solutions

YVI Tech specializes in optimizing data management processes and transforming existing systems into advanced, next-generation data platforms. Our solutions facilitate the consolidation of monitoring activities and provide significant value through a self-service console for data access, analytics, management, and optimization. We support scalable AI integration and assist in the development of comprehensive end-to-end solutions, ensuring seamless data processing and analysis.

Cloud and Infrastructure

We ensure the reliability and scalability of IT infrastructure through managed services, cloud consulting, data centre support, and DevOps integration. Our aim is to assist organisations in maintaining a digital ecosystem that is efficient, stable, and secure.

Cybersecurity Services

Equipped with experience in information security and employing ISO 27001 certified information security management practices, we help to achieve the robust protection of the companies' applications and networks.

Automation

At YVI Tech, we specialize in delivering advanced Robotic Process Automation (RPA) solutions designed to optimize operational efficiency, enhance productivity, and foster innovation. Our RPA services are customized to support your organization in automating repetitive manual tasks, allowing your team to focus on strategic initiatives that drive growth and operational excellence.

Enterprise Solutions

YVI TECHNOLOGIES DATA

We specialise in designing and implementing enterprise-level applications that facilitate seamless integration across various business functions, ensuring data consistency, process automation, and comprehensive operational visibility throughout the organisation. Expertise includes ERP, CRM, and enterprise system integration, as well as modernization of legacy applications and end-to-end system harmonisation.

Where Innovation Transforms into Action

YVI Tech is a results-driven information technology firm dedicated to providing distinctive, dependable, and innovative software solutions.

Our Values

Core Values

Integrity

Demonstrating honesty, transparency, ethical conduct, and accountability in all situations, thereby fostering trust and credibility.

Innovation

Supporting creativity, experimentation, continual improvement, and openness to rethinking traditional methods.

Collaboration

Encouraging teamwork, open communication, mutual support, and aligned objectives to achieve collective success.

Respect

Valuing every individual—whether team members, partners, or clients—by treating others with dignity and appreciating their unique contributions.

Results-driven

Committing to achieving high-quality outcomes, demonstrating ownership, and maintaining accountability for performance.

Social Responsibility

Upholding ethical principles beyond profit, including community engagement, sustainability efforts, and giving back to society.

YVI TECHNOLOGIES DATA

Oracle Supply Chain Management Resource

Our Oracle Supply Chain Management (SCM) resource integrates all aspects of your supply chain, from product conception to customer delivery, providing real-time visibility and enhancing efficiency across your organization. Please explore our website to learn how Oracle SCM can optimize your operations. For a personalized demonstration or consultation, do not hesitate to contact us.

Our Oracle SCM

Features

Unified SCM Platform

Oracle Supply Chain Management consolidates all supply chain functions into a unified, cloud-based platform. It enables smooth and efficient data integration across procurement, production, warehousing, and distribution processes.

Advanced Analytics

Leverage Oracle SCM's advanced analytics to make data-driven decisions. Obtain actionable insights that enable you to anticipate, adapt, and optimize your supply chain operations in real time.

Cloud-Based Flexibility

Our cloud platform provides exceptional security, scalability, and cost-effectiveness. It enables you to respond to market demands and expand your capabilities with minimal upfront investment.

Why choose us

Benefits

Drive Operational Efficiency

Automate and optimize your supply chain operations to enhance efficiency, reduce manual workload, minimize errors, and accelerate end-to-end processes.

Reduce Costs

Reduce operational expenses through enhanced inventory management and optimized supplier agreements. Oracle SCM supports waste minimization and cost containment, contributing to improved overall financial performance.

YVI TECHNOLOGIES DATA

Enhance Risk Management

Proactively identify and address supply chain risks using effective tools to anticipate and minimize potential disruptions before they affect your operations.

Commit to Sustainability

Attain your sustainability objectives by implementing efficient resource management, minimizing waste, and enhancing adherence to environmental standards.

Oracle SCM

Modules

Procurement Cloud

Enhance your procurement processes through optimized workflows, automated supplier negotiations, and effective contract management. This module is designed to assist organizations in streamlining and automating procurement activities. It offers functionalities for supplier management, sourcing, purchasing, and contract administration, enabling businesses to better control costs and mitigate risks associated with supplier relationships.

Logistics Cloud

Enhance your transportation and warehousing operations while ensuring border compliance through comprehensive global trade management solutions.

Product Lifecycle Management Cloud

Oversee each phase of the product lifecycle—from initial concept to successful release—with efficiency, collaboration, and innovation.

Supply Chain Planning Cloud

Synchronize your supply and demand using our integrated planning tools. Enhance your forecasting accuracy and optimize inventory management.

Manufacturing Cloud

Provide comprehensive support for diverse manufacturing processes through flexible, efficient, and integrated manufacturing solutions.

Inventory Management Cloud

Maintain accurate and optimized inventory levels through real-time tracking, automated reordering, and efficient order management processes.

Our Oracle SCM

Integration

YVI TECHNOLOGIES DATA

Seamless System Integration

Oracle SCM seamlessly integrates with your existing Oracle ERP, CRM, and HCM systems, thereby improving data consistency and accessibility.

Flexible Third-Party Integration

Integrate Oracle SCM seamlessly with other enterprise systems through robust APIs, enabling unified operations across varied IT environments.

Contact Us

Are you ready to proceed or require additional information? Please contact our sales team directly or complete our contact form. Our dedicated team is available to assist with any inquiries or to arrange a demonstration.

Oracle Financials

Oracle Financials, a component of Oracle's Cloud ERP solutions, provides a comprehensive suite designed to optimize financial management processes, support informed decision-making, and facilitate business growth. Please contact us to learn how Oracle Financials can enhance your financial operations. We offer customized demonstrations and consultations to meet your specific needs.

Our Oracle Financials

Features

Complete Financial Management

Utilize comprehensive financial functionalities, including general ledger, accounts payable, accounts receivable, fixed assets, and cash management, seamlessly integrated within a single cloud-based platform.

Advanced Financial Controls

Leverage strong financial controls to ensure accuracy, mitigate the risk of fraud, and uphold compliance with international accounting standards and regulations.

Real-Time Analytics

YVI TECHNOLOGIES DATA

Utilize integrated analytics to obtain real-time insights into your financial performance. Customize dashboards and reports to monitor key performance indicators (KPIs) and support data-driven strategic decision-making.

Automation and Efficiency

Automate routine tasks such as transaction processing and data entry to enhance efficiency. Optimize your financial workflows to close books more promptly and minimize manual errors.

Why choose us

Benefits

Drive Better Decisions

Make more informed decisions by leveraging comprehensive, real-time data access. Oracle Financials offers the insights and reporting capabilities needed to effectively understand and manage your financial environment.

Increase Efficiency and Reduce Costs

Automate and streamline your financial workflows to lower operational costs, enhance efficiency, and allocate resources more effectively toward strategic initiatives.

Ensure Compliance

Ensure adherence to financial regulations across multiple jurisdictions with Oracle Financials. Automated updates keep you consistently aligned with the latest compliance requirements, minimizing the need for manual adjustments.

Scalable for Growth

As your business expands, Oracle Financials scales accordingly. Seamlessly integrate new functionalities and modules to meet your evolving needs while maintaining operational continuity.

Oracle Financials

Modules

General Ledger

Obtain a comprehensive understanding of your financial position through our customizable and scalable ledger and accounting solutions.

Accounts Payable

YVI TECHNOLOGIES DATA

Automate invoice processing and payments to enhance operational efficiency, optimize cash flow management, and strengthen relationships with vendors.

Accounts Receivable

Optimize billing and collections procedures to enhance cash flow management and customer experience.

Cash Management

Enhance your liquidity and financial stability through effective management of bank accounts, accurate cash flow forecasting, and strategic investment planning.

Fixed Assets

Oversee the entire lifecycle of organizational assets, from acquisition to retirement, optimizing asset utilization and implementing effective depreciation strategies.

Our Oracle Financials

Integration

Seamless System Integration

Oracle Financials integrates smoothly with Oracle SCM, HCM, and other ERP solutions, promoting data consistency and delivering a comprehensive view of your business operations.

Flexible Third-Party Integration

Seamlessly integrate with third-party systems through reliable APIs, ensuring Oracle Financials aligns effectively within your current IT infrastructure.

Contact Us

Would you like to explore Oracle Financials in more detail? Our sales team is available to provide comprehensive product information, arrange a personalized demonstration, or address any questions you may have.

SAP Consulting Implementation

The SAP Activate methodology is SAP's content rich, agile methodology for the implementation and/or upgrade of SAP solutions across industries and customer environments. SAP Activate Methodology provides pre-built implementation content, accelerators, tools, and best practices that help consultants to deliver consistent and successful results across industries and customer environments.

YVI TECHNOLOGIES DATA

SAP Consulting and Implementation Excellence

YVI Tech provides comprehensive SAP consulting, implementation, and customization services, with a dedicated focus on achieving customer success and delivering meaningful business outcomes. Our methodology ensures that SAP solutions are not only technically robust but also strategically aligned with your operational and growth objectives.

HOW WE WORK

OUR APPROACH & INNOVATION

Our Approach

Our SAP delivery model is customer-centric and process-driven. We blend deep expertise with established practices to ensure seamless adoption and lasting results.

- Business-aligned implementations
- Organization-specific customizations
- Efficiency, scalability, and measurable ROI

Continuous Knowledge and Innovation

To remain at the forefront of the rapidly evolving SAP landscape, we invest continuously in our personnel and capabilities.

- Specialised SAP knowledge centres
- Systematic internal training programmes
- Ongoing upskilling on the latest SAP upgrades, S/4HANA innovations, and emerging technologies

FUNCTIONAL EXPERTISE

Functional Expertise Across Core Business Functions

Our consultants bring hands-on experience across enterprise functions, enabling integrated SAP solutions that align technology with real business operations.

FI/CO

Finance Management & Controlling

YVI TECHNOLOGIES DATA

End-to-end financial process enablement including general ledger, AP/AR, asset accounting, cost controlling, profitability analysis, and real-time financial reporting.

SD

Sales & Distribution

Optimization of order-to-cash processes, pricing, billing, credit management, and customer analytics to improve revenue realization and sales performance.

MM

Purchasing & Procurement

Streamlined procure-to-pay workflows covering vendor management, sourcing, inventory valuation, and invoice verification.

CS

Customer Service Operations

Configuration and enhancement of service management processes including service orders, warranty management, complaint handling, and customer interaction tracking.

WM

Warehouse & Inventory Management

Implementation and optimization of inventory planning, warehouse operations, goods movement, and stock visibility.

RE

Real Estate Management

SAP-enabled real estate lifecycle management including lease administration, contract management, property accounting, and compliance.

DELIVERY & IMPACT

INTEGRATION, DELIVERY & BUSINESS VALUE

Integration and Delivery Capabilities

We excel in managing complex SAP landscapes and integration scenarios with precision and reliability.

- Process-driven SAP implementation methodologies
- Expertise in SAP system integrations and harmonisation
- Ensuring seamless connectivity across enterprise applications

YVI TECHNOLOGIES DATA

- Diligent delivery with minimal disruption to business operations

Business Value Delivered

Business Value Delivered ensures faster SAP implementations with reduced integration risks, improved operational efficiency, and scalable solutions that support long-term organizational growth.

- Faster and more efficient SAP implementations
- Reduction in integration risks
- Enhanced operational efficiency
- Scalable solutions to support long-term organisational growth

Elevate Your Business with 360-Degree Salesforce Solutions

Are you ready to transform your business with the power of Salesforce? YVI Tech offers comprehensive Salesforce implementation and consultation services designed to elevate your operations and drive growth.

Our Expertise

Salesforce Implementation

Seamlessly integrate Salesforce into your existing systems, ensuring a smooth transition.

Customization

Tailor Salesforce to your specific business needs, optimizing efficiency and productivity.

Migration

Migrate your data to Salesforce securely and efficiently.

Integration

Connect Salesforce with other essential business applications for a unified platform.

Consulting

Receive expert guidance on best practices, strategies, and optimization.

Why Choose YVI Tech ?

Customer-Centric Approach

We prioritize your needs and goals, delivering solutions that align with your vision.

YVI TECHNOLOGIES DATA

Deep Salesforce Expertise

Our team possesses in-depth knowledge of Salesforce platforms and capabilities.

Proven Track Record

We have a history of successful Salesforce implementations for businesses of all sizes.

Innovation-Driven

We stay ahead of the curve by embracing the latest Salesforce trends and technologies.

Dedicated Support

Our team is committed to providing ongoing support and assistance.

Talk to Us

Leverage digital technologies to unlock new opportunities and drive innovation across all aspects of your organization.

Other Core Capabilities

Oracle ERP (Enterprise Resource Planning) provides a comprehensive suite of applications that encompass a wide range of business processes across multiple domains. This includes, but is not limited to, Oracle Human Capital Management (HCM), Oracle Supply Chain Management (SCM), and Oracle Financials.

Our other major streams in

Oracle ERP

Oracle Risk Management Cloud

This suite offers advanced controls, analytics, and monitoring tools designed to support risk management and regulatory compliance. It enables organizations to enforce policies, detect and mitigate financial fraud risks, and adhere to financial reporting regulations.

Oracle Project Portfolio Management Cloud

Oracle Project Portfolio Management (PPM) Cloud offers comprehensive and advanced solutions for the management of projects of all scales. The suite encompasses tools for project planning, resource allocation, risk assessment, and performance analysis, supporting organizations in effectively managing complex projects.

YVI TECHNOLOGIES DATA

Oracle Enterprise Performance Management Cloud

Oracle EPM Cloud offers applications for financial planning and analysis, financial consolidation and closing, and reporting. It enables organizations to effectively manage and enhance their financial performance by providing a comprehensive suite of advanced tools for budgeting, forecasting, and financial reporting.

Oracle Marketing Cloud

This component of the Oracle Customer Experience (CX) Cloud suite encompasses tools for marketing automation, customer segmentation, campaign management, and data analysis, designed to facilitate the development of personalized marketing strategies and improve customer engagement.

Oracle Sales Cloud

Within the Oracle CX Cloud suite, Oracle Sales Cloud facilitates the optimization of sales processes, enhances lead and opportunity management, and supports improved sales performance through advanced customer insights and sales force automation tools.

Oracle Service Cloud

This stream concentrates on service management, encompassing customer service and field service management. It offers tools for omnichannel service delivery, including call center operations, self-service portals, and field service management, aimed at improving customer satisfaction and service efficiency.

"These modules, in conjunction with Oracle HCM, Oracle SCM, and Oracle Financials, comprise a comprehensive suite of tools that enable organizations to automate and optimize their business processes across multiple functions. Each component is designed to integrate seamlessly with the others, offering a unified solution that utilizes cloud technology to improve operational efficiency, reduce costs, and support data-driven decision-making. "

Contact Us

Are you interested in exploring any of these Oracle streams? Our sales team is available to provide detailed product information, arrange a customized demonstration, or respond to any questions you may have.

Our UI/UX design

Services include

Research-driven UI/UX design

Our design team prioritizes research-driven approaches, emphasizing the collection of real-time user feedback and the development of intuitive, user-friendly interfaces to support innovative solutions.

Data Visualization

YVI TECHNOLOGIES DATA

We develop tailored visualizations for different user groups, ensuring their specific needs are prioritized. Our services help you analyze your database through intuitive and visually engaging representations.

Wireframing & Prototyping

Wireframes, mockups, and prototypes facilitate visualization of concepts, enable practical demonstration through demos, and allow for constructive feedback on your product ideas. They also assist in establishing an effective understanding of appropriate interaction patterns and layout structures.

UI/UX Consulting

YVI Soft offers around-the-clock financial services and solutions designed to promote innovation and help you maximize the benefits of digital technology within the financial industry.

UI/UX Audit Services

YVI Soft offers support for user testing, assessing the usability, accessibility, and visual design of products, as well as providing recommendations for improvements. Our UI/UX audits are focused on enhancing the overall user experience by promoting greater seamlessness and intuitiveness.

User Testing

Our team of specialists ensures that solutions function correctly across all devices. Testing methodologies are employed to evaluate the effectiveness and usability of the product for end users.

Web Application Development Full Stack

Our Company provides comprehensive web development services, including custom web application development, website design and development, e-commerce solutions, content management system (CMS) development, and web portal development. Our team of experienced web developers utilizes the latest technologies to deliver customized solutions that align with each client's specific needs. For professional and reliable web development services, YVI Tech is an excellent partner to consider.

YVI TECHNOLOGIES DATA

Robust and Resilient

Full Stack Web Development by YVI Tech

Business analysis

Our business analysts focus on thoroughly understanding the needs of your target audience to conduct requirements engineering and define the scope of the solution. They serve as a liaison between business stakeholders and the IT team, ensuring clear communication and alignment among all parties involved.

UX and UI design

We believe that effective design involves more than just aesthetic appeal; it also enhances functionality. Therefore, we prioritize the user experience by creating solutions that are user-friendly, intuitive, and engaging.

Architecture

Our solution architects will systematically plan and strategize all functional components, prioritizing feasibility and comprehensiveness. They will also carefully select the most appropriate technologies for implementation and thoroughly map out all API connections within the web solution to ensure seamless integration with external systems.

Front-end development

Our front-end development team is capable of implementing any design concept and ensuring the proper functionality of all interface elements. We have expertise with a wide range of popular JavaScript frameworks, including Angular, React, Meteor, Vue, Next.js, and Ember.

Back-end development

Our developers meticulously implement the business logic of your web application on the backend. We rely on robust frameworks to ensure efficient, high-quality coding across technologies such as .NET, Java, Python, Node.js, PHP, and Go.

YVI TECHNOLOGIES DATA

Integration

We develop APIs to facilitate seamless integration of your web application with corporate and third-party systems and services, ensuring real-time data synchronization across all platforms.

Testing and QA

Our commitment is to ensure that your web solution functions seamlessly, delivers optimal performance, provides an intuitive user experience, and adheres to the highest security standards. With a dedicated team of experienced testing professionals, we are confident in our ability to uphold these commitments.

Help desk

We provide Level 1, Level 2, and Level 3 support services, ensuring the delivery of hotfixes within 24 hours to promptly address and resolve any issues related to usage, technology, or code. Our goal is to support you in maintaining high availability and seamless functionality of your web application.

Continuous support and evolution

Our team specializes in optimizing your web-based software to enhance its performance, maintain competitiveness in the market, and accommodate your evolving business needs. Through our comprehensive DevOps practices, we are capable of implementing essential updates within 1-2 days and deploying new, well-planned functional modules on a regular schedule of every 2 to 6 weeks.

Our process

GENERIC APPROACH

We provide flawless services through our approach

Release is not the end of our collaboration. We will continue working with you and help you grow the system so it can bring you even more value in the long term.

Mobile App Development

YVI TECHNOLOGIES DATA

Our company specializes in mobile app development and is well-equipped to help you tackle complex business challenges while maintaining a competitive edge. We enhance customer satisfaction by delivering high-quality digital solutions that enable a seamless, omnichannel experience.

Explore our wide range of

Mobile app development services

Confirm the viability of product concepts

Our specialized exploration and design session enables you to validate ideas and develop practical solutions that are both feasible and deliver genuine value to customers. The evidence-based prototype supports the creation of applications with measurable business impact and the potential for profitable returns.

Turn the product vision into a tangible reality

YVI Tech offers an extensive portfolio of over 10 mobile solutions across various industries, demonstrating a strong capability to transform concepts from initial development to market deployment. With expertise in UI/UX design, programming, testing, system integration, and ongoing app maintenance, YVI Tech is well-equipped to deliver innovative and reliable mobile solutions.

Embody innovation and stay one step ahead

Our research and development laboratories continuously investigate advanced technologies, design methodologies, and development strategies to expand the boundaries of technological innovation. The results of our research provide you with a competitive advantage when addressing complex challenges that require innovative solutions.

Accelerate project delivery

Our cross-functional team members are available to support your mobile app development process at any stage. This allows you to augment your team's expertise to address specific skill requirements or to develop comprehensive solutions, all while ensuring timely delivery and maintaining high standards of quality.

Modernize legacy mobile apps

YVI TECHNOLOGIES DATA

If your mobile applications are outdated, hosted on inefficient servers, or feature outdated interface designs, we can assist in developing solutions that modernize your legacy systems while maintaining data integrity and security with minimal disruption.

Optimize low-performing apps

With our specialized domain expertise, our mobile app development company has the knowledge required to optimize the performance of your existing applications. Our testing and quality assurance services are both cost-effective and agile, delivering measurable improvements in overall quality.

Looking for a mobile app development partner?

Expand your global presence through our cross-platform application development services. Contact us today to grow your reach.

Mobile Application

Development Technologies

iOS/iPhone App Development

Our expertise in iOS application development allows us to deliver robust, flexible, secure, and versatile solutions. We develop a wide range of iOS applications for iPhone, iPad, Apple Watch, and Apple TV platforms. Additionally, we utilize advanced technologies such as Swift, SwiftUI, CocoaPods, and others to create innovative applications that meet and exceed client expectations.

Android app development

We specialize in developing comprehensive Android applications tailored to meet the unique needs of your industry and customers. Our expertise includes creating solutions for a variety of Android devices, including smartphones, tablets, televisions, and wearables. Partnering with our mobile app development team ensures that you deliver meaningful value to your customers.

Enterprise mobile app development

We specialize in developing enterprise solutions that focus on delivering exceptional user experiences and fostering effective engagement with clients, partners, and employees. Our applications are designed to streamline business processes, operate seamlessly across multiple platforms, provide real-time analytics, and maintain a high standard of robustness and security.

YVI TECHNOLOGIES DATA

Native mobile app development

Our team of experienced developers specializes in creating native applications for Android and iOS platforms. Our applications are engineered to deliver high performance, feature a comprehensive array of functionalities, ensure user engagement and intuitiveness, and provide outstanding UI/UX design. We look forward to supporting you in differentiating your business from competitors through our superior native mobile app development services.

Manufacturing Cloud

Provide comprehensive support for all manufacturing processes through flexible, efficient, and integrated manufacturing solutions.

Hybrid mobile app development

We offer assistance in developing hybrid mobile applications that operate smoothly across multiple platforms and closely resemble native applications. Leveraging our expertise in hybrid app development enables you to reduce time to market, minimize production and maintenance costs, and deliver high-quality solutions.

Data & AI Solutions

YVI Tech specializes in optimizing data management processes and transforming existing systems into advanced, next-generation data platforms. Our solutions facilitate the consolidation of monitoring activities and provide significant value through a self-service console for data access, analytics, management, and optimization. We support scalable AI integration and assist in the development of comprehensive end-to-end solutions, ensuring seamless data processing and analysis.

Data advisory services

Data Solutions

Data Ingestion

In today's data-driven environment, organizations must effectively gather, process, and transfer data from multiple sources into analytical data repositories to support real-time insights. Whether your data resides within SaaS applications, ERP systems, databases, or cloud storage, we facilitate seamless data integration to enable informed, AI-supported decision-making.

Data Storage

YVI TECHNOLOGIES DATA

Organizations today are managing an unprecedented volume of data, necessitating systems that enable efficient storage, management, and accessibility to support analytics and AI-driven insights. Whether your requirements include a high-performance data warehouse for real-time dashboards or a cost-effective data lake for large-scale storage, we provide solutions tailored to your needs.

Data Transformation

Raw data stored in isolated systems requires transformation to be useful. To derive valuable insights, data must be properly cleaned, structured, and enhanced to support analytics, artificial intelligence, and business intelligence initiatives.

Data Modelling

An inadequately designed data model can result in redundancy, inefficiency, and implementation difficulties. Conversely, a well-structured data model promotes scalability, flexibility, and optimal performance for feature-rich applications.

Data Migration services

As cloud-native solutions become the standard, organizations must migrate their growing volumes of data to scalable, cost-efficient cloud storage and databases.

Data Orchestration

As organizations expand globally, effectively managing multiple data sources across various applications can be complex. Data orchestration facilitates seamless data integration, automation, and transformation to support real-time analytics.

Data advisory services

Data Analytics

Machine Learning Applications

Machine learning is transforming industries by improving automation, increasing efficiency, and supporting data-driven decision-making. Its applications span sectors such as healthcare, finance, marketing, and autonomous transportation, contributing to more intelligent and adaptable business operations.

YVI TECHNOLOGIES DATA

Business Intelligence

To maintain a competitive edge in today's dynamic marketplace, organizations must extract valuable insights from transactional data to inform strategic decision-making and operational processes. Implementing a Business Intelligence platform provides analysts with robust features such as drill-down, drill-through, and drill-up capabilities, facilitating comprehensive data exploration across various levels. In a rapidly evolving business environment, effective utilization of data is essential for sustained success. Business Intelligence (BI) systems are integral in converting raw transactional data into actionable insights, thereby enhancing both strategic planning and operational efficiency.

Automated Report Delivery

Automated Report Delivery enhances organizational efficiency by streamlining reporting processes and ensuring timely dissemination of business insights. The following provides an overview of its primary benefits and practical applications across diverse industries.

AI advisory services

Artificial Intelligence

AI powered Virtual Assistance

AI-driven virtual assistance is revolutionizing business operations by improving customer engagement, streamlining routine processes, and increasing overall operational efficiency.

Document Summarization

AI-driven document summarization offers a significant advancement for organizations managing large volumes of unstructured data. It facilitates the efficient extraction of key insights, helping to mitigate information overload and support more informed decision-making.

LLM Evaluation

Evaluating Large Language Models (LLMs) is essential for ensuring the quality, reliability, and accuracy of AI-generated responses. Ongoing assessment enables the refinement of LLM performance, aligning it with user expectations and industry best practices.

YVI TECHNOLOGIES DATA

RAG Application

Retrieval-Augmented Generation (RAG) applications leverage the capabilities of large language models (LLMs) in conjunction with real-time data retrieval, resulting in more accurate, current, and contextually relevant AI-generated responses.

Tool Augmented Chatbots

AI utilizes external tools to enhance its reasoning and problem-solving capabilities. Similar to a proficient technician in a workshop, when encountering a particular task, the AI selects the most appropriate instrument from a well-organized toolset.

Agentic AI

AI systems engineered to independently make decisions and execute actions, capable of pursuing complex objectives with minimal oversight. They combine the adaptable features of large language models (LLMs) with the precision of conventional programming approaches.

OnDemand Services

Enterprise Data Management

YVI Tech modernizes business landscape with an effective Enterprise data management (EDM). It is the process of managing and governing an organization's data assets to ensure their accuracy, quality data accessibility, and security. It involves the implementation of modern data management practices that enable organizations to handle the vast amounts of data they produce. EDM is crucial for maintaining data quality, data catalogue, ensuring data security & privacy , and achieving regulatory compliance through data governance.

Data Quality: One of the key components of enterprise data management is ensuring data quality. Poor data quality can lead to inaccurate and misleading insights, which can negatively impact decision-making and business outcomes. By implementing proper data management practices, organizations can ensure that their data is accurate, timely, and reliable.

Data Catalogue: A Data Catalogue is a systematically organized inventory of an organization's data assets, which encompasses metadata that provides information about the data.

YVI TECHNOLOGIES DATA

Data Security & Privacy: Storing data securely and ensuring that it is accessible to authorized users is a fundamental part of enterprise data management. Organizations must invest in robust data storage solutions, such as data warehouses and data lakes, to store their data efficiently. Additionally, ensuring real-time access to data enables organizations to make timely and informed decisions.

Data Governance: Data governance is another critical aspect of enterprise data management. It involves establishing policies, procedures, and standards for managing data throughout its lifecycle. Data governance ensures that data is handled consistently across the organization, reducing the risk of data silos and improving data integration.

Robotic Process Automation (RPA) Services. Empowering Businesses with Smart Automation Solutions

At YVI Tech, we specialize in providing advanced Robotic Process Automation (RPA) solutions that optimize operations, increase productivity, and support innovation. Our RPA services are tailored to assist your organization in automating repetitive, manual tasks, enabling your team to concentrate on strategic initiatives that promote growth and efficiency.

Robotic Process Automation (RPA)

Why RPA?

Robotic Process Automation is transforming the way industries operate. By integrating RPA into your business processes, you can:

Reduce Operational Costs

Automate routine tasks to enhance efficiency and reduce reliance on manual labor, thereby significantly lowering operational costs.

Enhance Accuracy:

Reduce the likelihood of human error by utilizing robotics to execute precise, repetitive tasks.

Increase Productivity

Allow your employees to dedicate more time to value-added activities by reducing their involvement in routine tasks.

YVI TECHNOLOGIES DATA

Scalability

Effortlessly adjust staffing levels in response to business needs without the necessity of recruiting additional personnel.

Improve Customer Service

Enhance responsiveness and accuracy in addressing customer inquiries through the implementation of automated processes.

Our RPA Solutions

Include

RPA Strategy and Consulting

We assist you in identifying processes most suitable for automation, establishing well-defined RPA objectives, and developing a strategic roadmap for implementation and expansion.

RPA Implementation

Our specialists implement and configure RPA software to ensure seamless integration with your existing IT infrastructure while minimizing operational disruptions.

Custom RPA Development

Customized automation solutions designed to meet your specific business requirements, utilizing UiPath, a leading Robotic Process Automation (RPA) platform.

Maintenance and Support

Provision of continuous support and maintenance to ensure the optimal performance of your RPA solutions, including regular updates and enhancements.

OUR APPROACH IS INDUSTRY FIRST

Industries We Serve

Our RPA solutions passionately serve a diverse array of industries—finance, healthcare, manufacturing, retail, and beyond—dedicating ourselves to creating bespoke automation strategies that truly transform the way these fields overcome their unique challenges. We're driven by a unwavering commitment to empower each sector, unleashing new possibilities and inspiring breakthroughs that elevate their success to unprecedented heights.

YVI TECHNOLOGIES DATA

Start Your Automation Journey Today

Begin your automation journey with YVI Tech and enhance your business operations through our advanced RPA solutions. Please contact us to schedule a consultation and explore how we can help your organization become more efficient, innovative, and agile.

We leverage AI to streamline and enhance SEO efforts by identifying high-value keywords, optimizing on-page content, and analysing backlink opportunities to improve search engine rankings and increase organic traffic.

Creative Asset Production

From dynamic banner ads to custom video scripts and visual concepts, our Generative AI capabilities enable us to produce a variety of creative assets efficiently, ensuring your campaigns are visually appealing and distinctive.

Digital Solutions

Why Choose Us?

Expertise in Generative AI

Our team has specialized knowledge in applying Generative AI to digital marketing, providing you with a competitive edge.

Commitment to Innovation

We continually integrate the latest advancements in AI to offer innovative, cutting-edge marketing solutions.

Scalable Solutions

Our AI-enabled methods allow us to scale your marketing efforts seamlessly, regardless of your business size, without sacrificing quality.

Data-Driven Approach

We base our strategies on real-time data and AI insights, ensuring that every campaign is measurable and effective.

Let's Elevate Your Digital Presence

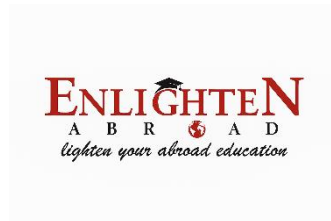

If you are prepared to leverage Generative AI to enhance your digital marketing efforts, partner with Dizi Babu Soft Solutions. We are dedicated to creating intelligent, impactful campaigns that leave a lasting impression.
