

YOUR VISION IDEATED

PROFILE

YVI TECHNOLOGIES

Welcome to YVI Technologies.

With deep expertise in Enterprise solutions, Automation, Digital Innovation, AI, and high-performance team delivery, we empower organizations to transform, scale and excel.

ABOUT US

YVI TECH is a next-generation Technology consulting company helping businesses unlock growth through digital transformation, AI and data-driven solutions. Our Core team comprises 150+ years of experience

OUR VISION

Establish ourselves as a leading global consulting firm by prioritizing what truly matters to our clients.

OUR MISSION

We collaborate with you to understand your business objectives and provide efficient software development solutions through an agile approach.

OUR SERVICES & OFFERINGS

ORACLE SOLUTIONS

[EBS/Cloud]

- Application Support Services
- Oracle Infra & DB services
- Oracle Cloud SaaS Services (HCM, ERP, EPM, SCM Cloud)
- Integration & Oracle Cloud PaaS Services
- Cloud Infrastructure Services

ENTERPRISE SOLUTIONS

RPA & Intelligent Automation

[Ui Path, Power Automate]

- Automation Phases
- Applications, Benefits
- Intelligent Automation [AI/ML]

QA & TESTING

- Manual & Automation
- Performance & Compatibility Testing

CLOUD & INFRASTRUCTURE

Multi-cloud Support

DIGITAL SOLUTIONS

DATA & AI SOLUTIONS

- **Data Engineering**
 - ✓ Cloud Data Warehousing
 - ✓ Advanced SQL & Data Modelling
 - ✓ ETL / ELT Frameworks
 - ✓ Real-time Data Processing
- **Data Science**
- **Analytics & Visualization**
- **Artificial Intelligence (AI)**
 - ✓ AI Powered Virtual Assistance
 - ✓ Document Summarization
 - ✓ LLM Evaluation
 - ✓ RAG Application
 - ✓ Tool Augmented Chatbots
 - ✓ Agentic AI

ORACLE EXPERTISE & CORE TEAM SPECIALITIES

- APPLICATION SUPPORT SERVICES
- INFRA & CORE DATABASE SERVICES
- YVI -SUPPORT SERVICES (AMS)
- DATABASE & OS SERVICES
- ORACLE CLOUD SaaS SERVICES
- CLOUD INFRA & IaaS SERVICES
- INTEGRATION & PaaS

OUR EXPERTISE

Streamlining H2R, O2C, and P2P processes through integrated controls and analytics, leveraging diverse industry expertise.

- Ensuring Oracle configurations meet compliance, scalability, and future workforce needs
- Optimizing Oracle HCM Payroll, Core HR, and Talent Management using Oracle Journeys for seamless, role-based employee experiences
- **Excellent Technical & Integration Capability**
- Oracle Integration Cloud (OIC), SOA
- **Legacy-to-Cloud (OCI) Migration Excellence:**
Assessment-driven migration, minimal disruption, optimized performance, cost efficiency, and scalable cloud-native solutions

OUR CORE TEAM COMPOSITION

- OCI Certified Architects: 10+
- Oracle Fusion Applications Consultants: 15+
- Oracle Certified Professionals (OCP) in Database: 5+
- Oracle Solution & Technical Architects: 11+
- Oracle Integration/ Data migration Specialists: 10+
- Oracle Security & Compliance Experts: 3+
- Project Managers: 3+
- Multi-lingual speaking Resource including (Arabic, Japanese, French)

DATA PLATFORM & OUR CORE CAPABILITIES

CLOUD – DATA ENGINEERING

- **Cloud Data Warehousing** – Proficiency with Snowflake, AWS Redshift and Google BigQuery to leverage elastic, cloud-native scalability.
- **Advanced SQL & Data Modeling** – Complex, performance-optimized SQL, multi-source integration (relational and NoSQL), and flexible analytical data models.
- **ETL / ELT Frameworks** – Scalable pipeline orchestration and transformation using dbt and Apache Airflow.
- **Programming (Python / Java)** – Automation, data processing, and API-driven integrations.
- **Real-time Data Processing** – Streaming ingestion and processing for near-real-time analytics and IoT-driven use cases.

DATA GOVERNANCE & SECURITY

Security Protocols – Encryption, RBAC, data masking and secure access patterns for distributed cloud platforms.

Compliance – Data platforms designed to support regulatory needs such as GDPR and HIPAA.

ANALYTICAL WAREHOUSE

- Engineered a highly adaptive Schema-on-Read architecture that accommodates evolving industrial data structures without downstream disruption
- Established a Governed Single Source of Truth (SSOT), empowering analysts with high-fidelity, pre-processed datasets
- Developed a Unified Operational Intelligence Hub providing a 360-degree 'Bird's Eye' view of the entire industrial footprint.
- This aggregates disparate sensor streams into a centralized dashboard, enabling cross-plant benchmarking and real-time executive oversight.

DIGITAL SOLUTIONS & OUR CORE CAPABILITIES

DIGITAL SOLUTIONS

We deliver end-to-end digital solutions that help organizations modernize applications, improve customer engagement, and accelerate digital transformation.

Our Team Specialities:

- Modern web technologies
- Enterprise integrations
- Cloud-native architecture
- DevOps automation
- Scalable backend platforms

OUR APPROACH

We follow modern architecture principles to ensure long-term Sustainability and flexibility

- Cloud-native design
- Microservices architecture
- API-first integration
- Secure and compliant frameworks
- Scalable infrastructure

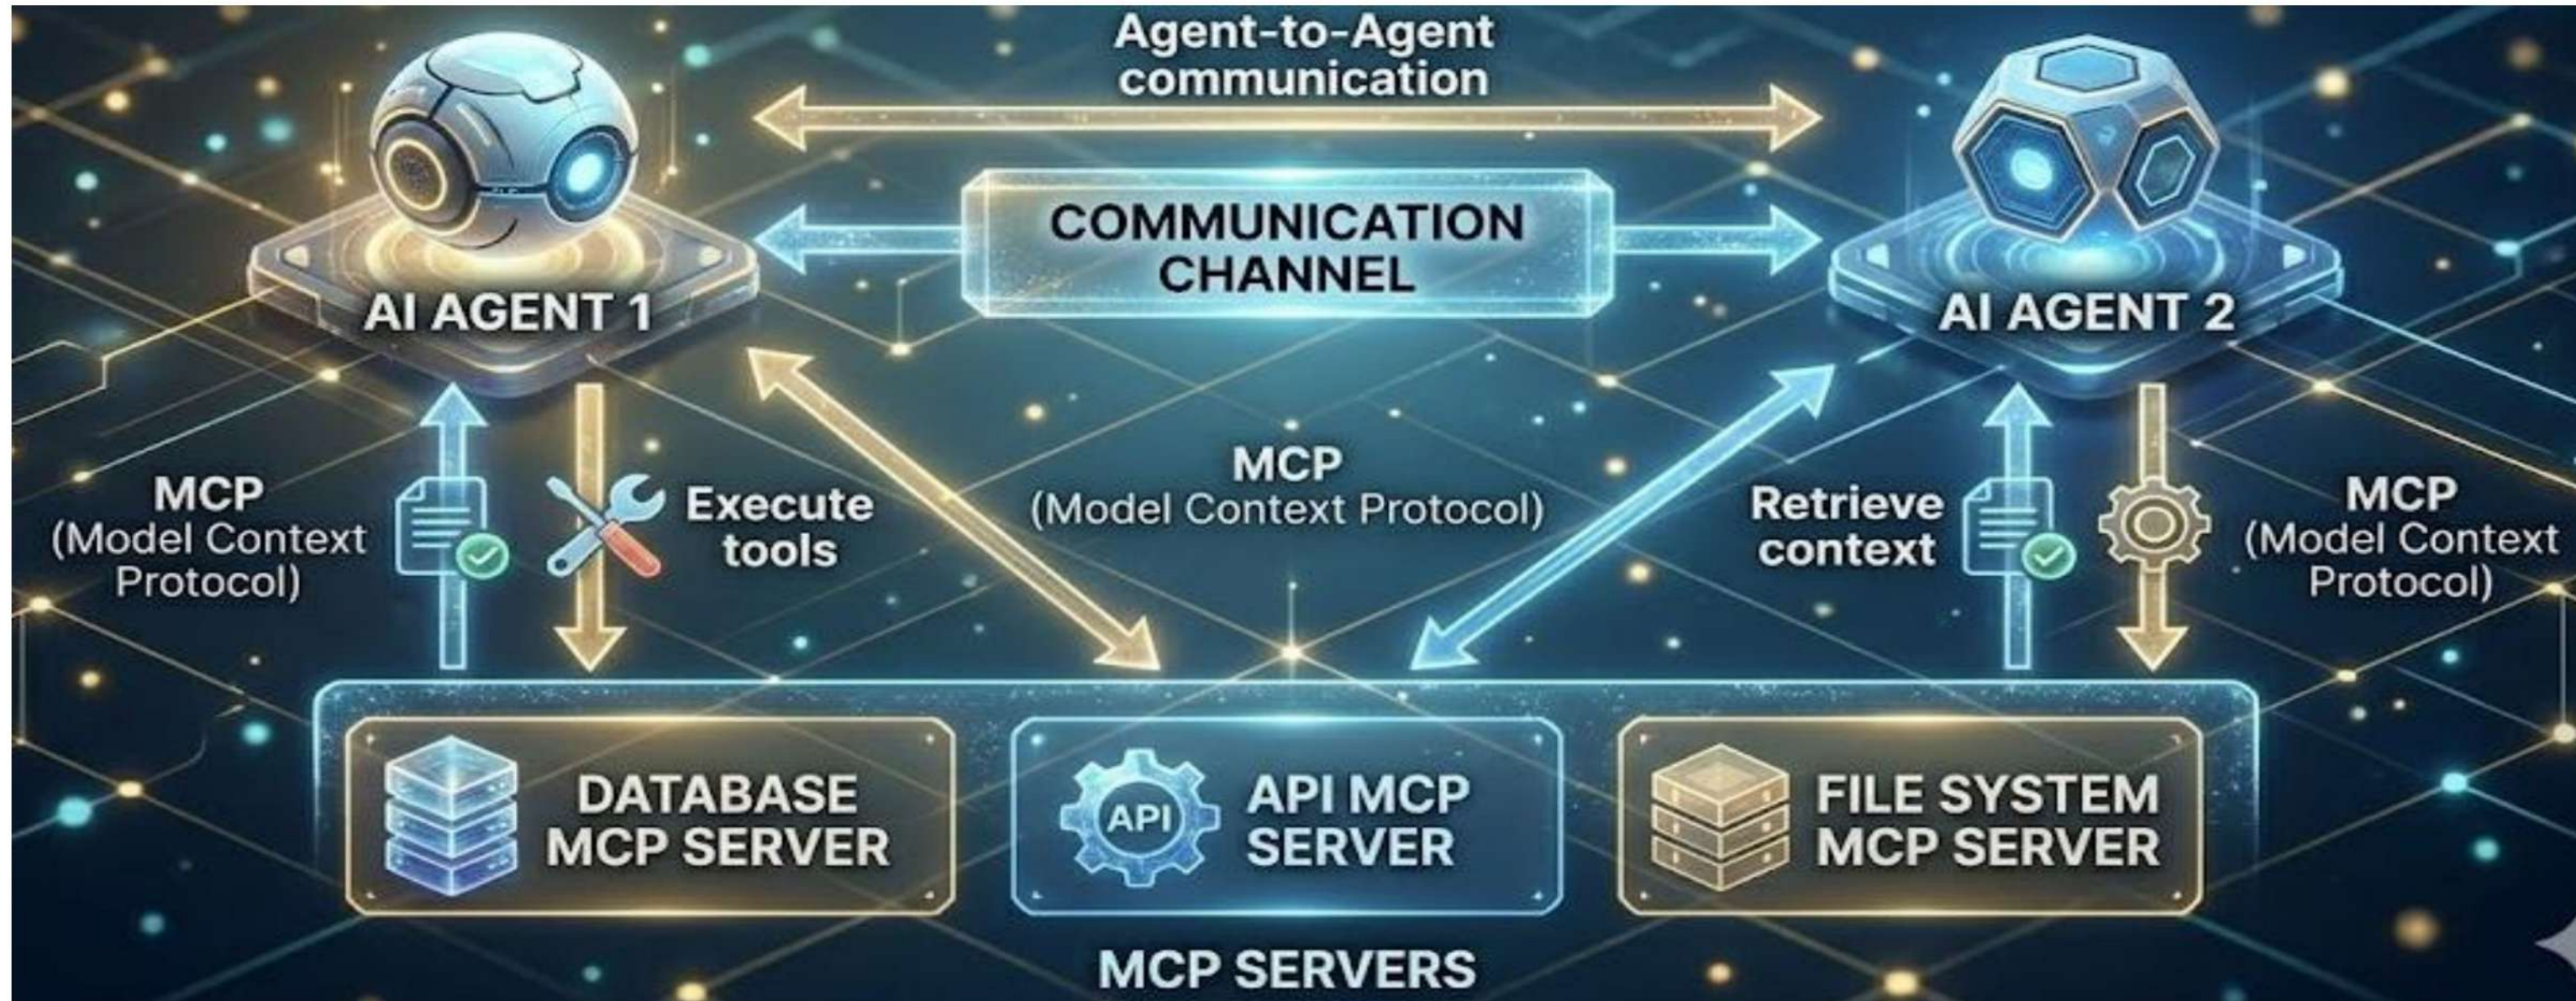

OUR EXPERTISE & VALUE PROPOSITION

- Deep Expertise in Enterprise Solutions
- Modern Technology Stack
- Integration Specialists
- Cloud-First Approach
- End-to-End Delivery

We help organizations:

- Accelerate digital transformation
- Improve operational efficiency
- Enhance customer experience
- Modernize legacy systems
- Build scalable and future-ready digital platforms

Orchestrator Agent via Model Context Protocol (MCP)

Agent-to-Agent(A2A)

- ✓ Agents communicate directly with each other
- ✓ Share context and knowledge
- ✓ Delegate tasks to specialized agents
- ✓ Coordinate actions collaboratively
- ✓ Enables distributed, scalable AI systems

MCP(Model Context Protocol)

- ✓ Standard interface for AI agents to access tools & data
- ✓ Securely connects agents to APIs, databases, and files
- ✓ Provides structured context for agent tasks
- ✓ Enables modular and reusable agent-tool integration
- ✓ Supports scalable, enterprise-ready AI workflows

Automation & RPA - OUR CORE CAPABILITIES

RPA & AI Services

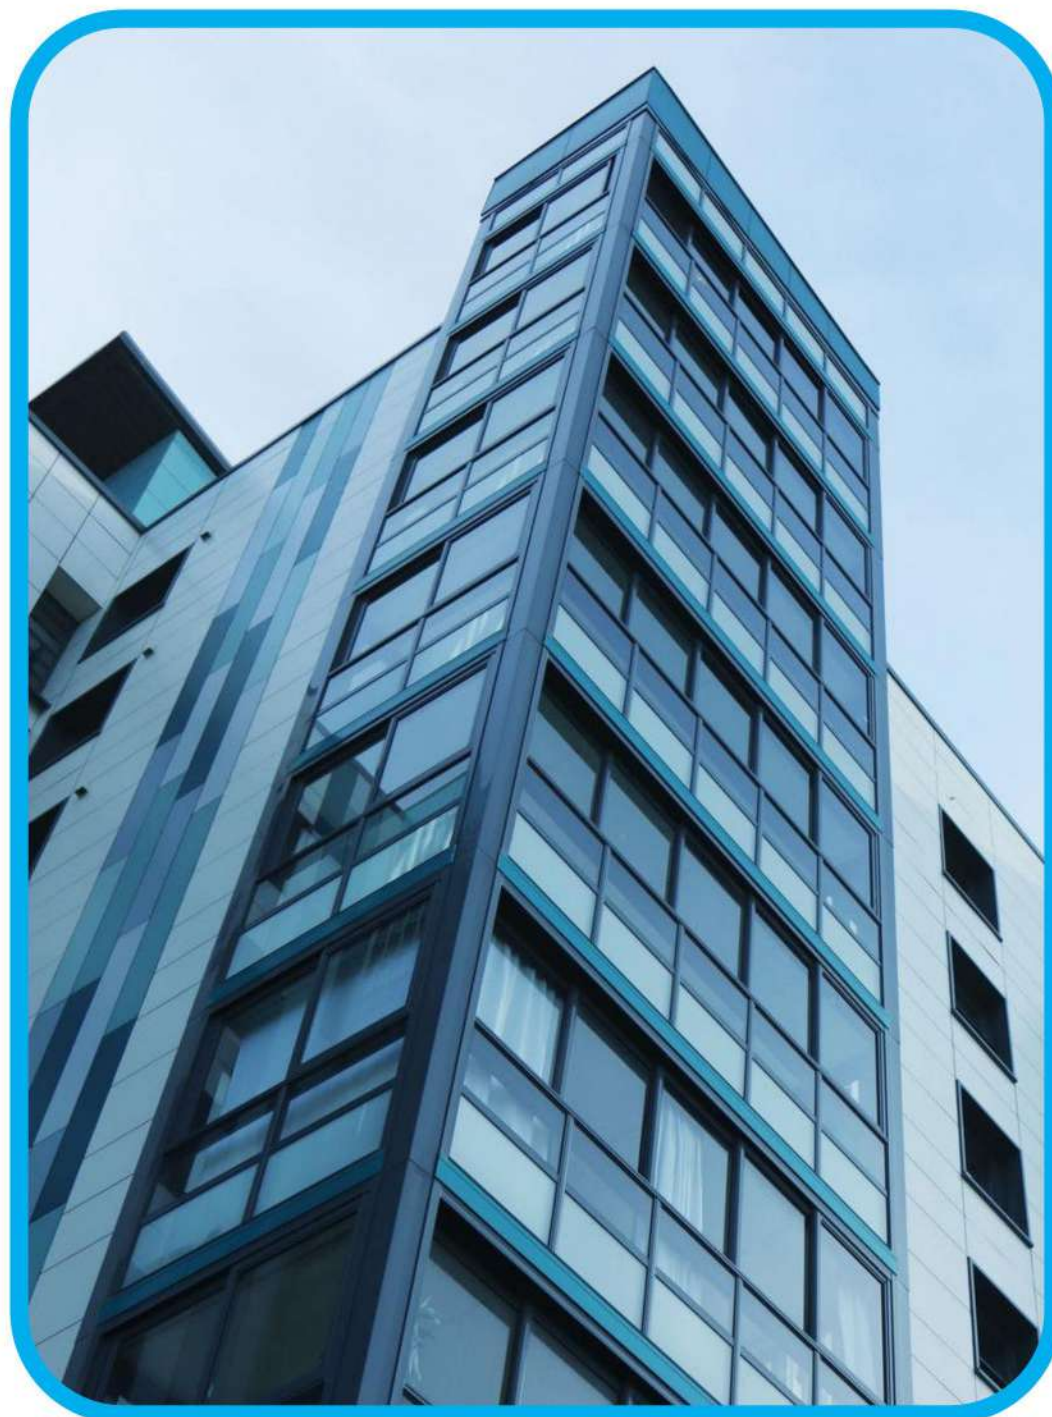

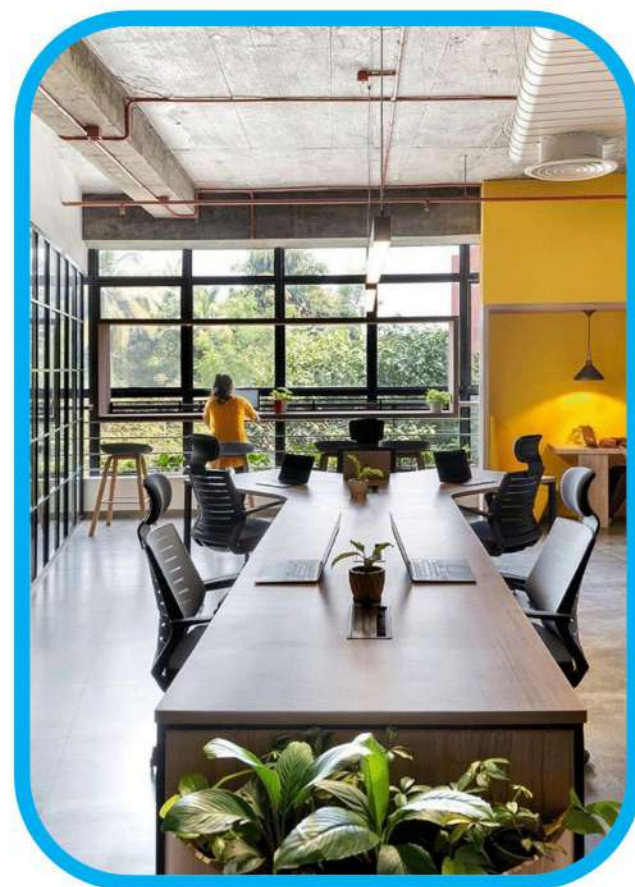

- Process Mining & Consultation
- Process Assessment & Delivery
- Intelligent Document Processing
- AI, ML, LLMs
- Gen AI & Agentic AI
- Microsoft Document Intelligence
- Robot Infra setup & Monitoring

Why Choose US

- ✓ End-to-End Automation Expertise
- ✓ Proven Process Discovery & Optimization
- ✓ Enterprise-Grade RPA Delivery & Support
- ✓ Advanced Document Automation Capabilities
- ✓ Deep Intelligence Across AI Technologies
- ✓ Human & Digital Workforce Integration
- ✓ Platform-Agnostic, Value-Focused Approach
- ✓ Accelerated Delivery Through Reusable Assets

Benefits

- ✓ **Enhanced Efficiency:** Bots operate nonstop at high speed, swiftly completing tasks and minimizing bottlenecks.
- ✓ **Cost Reduction:** Eliminating manual entry and repetitive tasks cuts labor costs and operational expenses by up to 59%.
- ✓ **Greater Accuracy:** RPA removes human errors, ensuring consistent, precise results vital for compliance and data integrity.
- ✓ **Scalability:** RPA enables easy scaling of operations to handle peaks without major infrastructure costs.
