

CORPORATE PROFILE

Technology. Innovation. Solutions

Enterprise Oracle Solutions- RPA & Intelligent- Digital Solutions - Cloud & Infrastructure

Data & AI Solutions- QA & Testing- Cyber Security & Compliance

Your Vision Ideated

YVITECH | IT CONSULTING & SERVICES

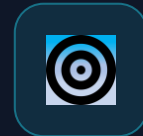

YVI Technologies is a next-generation technology consulting company helping businesses unlock growth through digital transformation, AI, and data-driven solutions — backed by a core team with 150+ years of collective experience.

150+

years of collective
team experience

OUR VISION

To be a leading global consulting firm by prioritizing what truly matters to our clients.

OUR MISSION

We partner with clients to deliver efficient, agile software and data solutions built around their goals.

WHAT DRIVES US

Diversified Industrial Expertise

World class IT Consulting & Services

Governance, Risk & Compliance Audits

Enterprise Cloud, Security & AI

Six Pillars of Our Enterprise Delivery

RPA & Intelligent Automation

UiPath, Power Automate

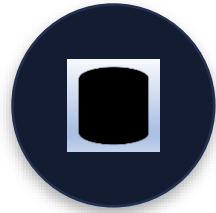

Enterprise Oracle Solutions

EBS & Oracle Cloud

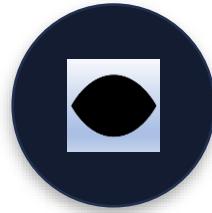

Digital & Cloud Infrastructure

Digital Engineering- OCI, AWS, Azure, GCP

Data & AI Solutions

Engineering, Analytics, AI Governance

QA & Testing

Manual & Automation

Cybersecurity & Compliance

VAPT, ISO 27001, SOC

Our Core Capabilities

OUR SERVICES

- Application Support Services
- Infra & Core Database Services
- YVI Support Services (AMS)
- Database & OS Services
- Oracle Cloud SaaS Services
- Cloud Infra & IaaS Services
- Integration & PaaS

OUR EXPERTISE

- Streamlining H2R, O2C, and P2P processes through integrated controls and analytics
- Ensuring Oracle configurations meet compliance, scalability, and future workforce needs
- Optimizing Oracle HCM Payroll, Core HR & Talent Management via Oracle Journeys
- Technical & integration capability across Oracle Integration Cloud (OIC), SOA
- Legacy-to-Cloud (OCI) migration: assessment-driven, minimal disruption, cost efficiency

OUR TEAM COMPOSITION

- OCI Certified Architects: 10+
- Oracle Fusion Applications Consultants: 15+
- OCP in Database: 5+
- Oracle Solution & Technical Architects: 11+
- Integration/Data Migration Specialists: 10+
- Oracle Security & Compliance Experts: 3+
- Project Managers: 3+
- Multi-lingual: Arabic, Japanese, French

ERP Cloud

Financials · Procurement · Projects · Risk Management

HCM Cloud

Core HR · Talent · Payroll · Workforce Analytics

SCM Cloud

Planning · Manufacturing · Logistics · Product Lifecycle

Our Core Capabilities

Enhanced Efficiency

Bots operate nonstop at high speed, swiftly completing tasks and minimizing bottlenecks.

Cost Reduction

Eliminating manual entry and repetitive tasks cuts labor costs by up to 59%.

Greater Accuracy

RPA removes human errors, ensuring precise, compliant results.

Scalability

RPA enables easy scaling of operations without major infrastructure costs.

RPA & AI SERVICES

- Process Mining & Consultation
- Process Assessment & Delivery
- Intelligent Document Processing
- AI, ML, LLMs
- Gen AI & Agentic AI
- Microsoft Document Intelligence
- Robot Infra Setup & Monitoring

WHY CHOOSE US

- End-to-End Automation Expertise
- Proven Process Discovery & Optimization
- Enterprise-Grade RPA Delivery & Support
- Advanced Document Automation Capabilities
- Deep Intelligence Across AI Technologies
- Human & Digital Workforce Integration
- Platform-Agnostic, Value-Focused Approach
- Accelerated Delivery via Reusable Assets

Our Core Capabilities

CLOUD – DATA ENGINEERING

- Cloud Data Warehousing — Snowflake, AWS Redshift, Google BigQuery
- Advanced SQL & Data Modeling — complex, performance-optimized, multi-source
- ETL / ELT Frameworks — pipeline orchestration via DBT and Apache Airflow
- Programming (Python / Java) — automation, processing, API integrations
- Real-time Data Processing — streaming ingestion for near-real-time & IoT

ANALYTICAL WAREHOUSE

- Adaptive Schema-on-Read architecture accommodating evolving data structures
- Governed Single Source of Truth (SSOT) with high-fidelity, pre-processed datasets
- Unified Operational Intelligence Hub — 360° 'Bird's Eye' view of the industrial footprint
- Aggregates disparate sensor streams into a centralized dashboard for cross-plant benchmarking

DATA GOVERNANCE & SECURITY

- Security Protocols — encryption, RBAC, data masking, secure access patterns
- Compliance — data platforms designed to support GDPR and HIPAA requirements

Data Sharing

Data Products · APIs · Secure Data Exchange

Data Science & ML

Notebooks · Python · R · Feature Store · MLOps

AI & GenAI Applications

LLM · RAG · Agents · Chatbots · Copilots

BI & Reporting

Power BI · Tableau · Looker · Qlik

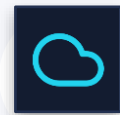

Our Core Capabilities

EXPERTISE & VALUE PROPOSITION

- Deep expertise in enterprise solutions
- Modern technology stack
- Integration specialists
- Cloud-first approach
- End-to-end delivery
- Helping organizations accelerate digital transformation & modernize legacy systems
- Improve operational efficiency and enhance customer experience

DIGITAL SOLUTIONS

End-to-end digital solutions that modernize applications, improve customer engagement, and accelerate transformation.

- Modern web technologies
- Enterprise integrations
- Cloud-native architecture
- DevOps automation
- Scalable backend platforms

OUR APPROACH

Modern architecture principles ensuring robust, reliable and resilient delivery.

- Sustainability and flexibility
- Cloud-native design
- Microservices architecture
- API-first integration
- Secure and compliant frameworks
- Scalable infrastructure

AWS

EC2 · S3 · RDS · Lambda · EKS

AZURE

VMs · Blob Storage · SQL · AKS · Functions

GCP & OCI

Compute Engine · BigQuery · GKE · Autonomous DB

Recent Initiatives, Measurable Results

Financial Reporting Model

40–50%

less reporting effort

Payroll Consolidation

16 hrs → 20 min

processing time

Edge-to-Cloud Integration

100%

audit compliance

Automation Testing (QA)

70%

less regression time
